AKUKUT™

Depth-Controlled Cutter

- Uses a cutting blade that is held accurately without waver, wander, or wobble.
- Easy to adjust depth of cut.
- Cuts squarely with minimum burring.
- Makes it impossible to cut into a straight edge guide.
- Eliminates cut fingers.

Controls depth of cut to less than a thousandth of an inch.

The Akukut is a precision, hand-held depth-controlled cutter, to which a single edge blade is clamped. The bottom section is an adjustable ruby-hard foot, which controls the depth of cut. Akukut can be used in a left or right hand mode.

It is ideal for splitting the front or back on pressure sensitive labels. Vinyl sign printers will find the hand-held Akukut an indispensable, low-cost means to custom fit graphics at customer's site.
